

Compac's leading, low cost Fuel Management System.

The USB FMS is part of Compac's superior, stand-alone Fuel Management solutions.

A range of authorisation options are available. Then using USB data transfer you can manage transactions, cards and pricing.

No software installation is required.

USB Fuel Management offers secure and reliable refuelling.

Compac's USB Fuel Management System cleverly utilises the best features of a USB data transfer system, to provide user-friendly unattended refuelling to your customers.

The USB Fuel Management System

- Removes the need for complex computer software. Simply connect your authorised USB stick to the PC in order to display past transactions in an easy-to-use spreadsheet
- Can hold up to 4000 transactions
- Can upload new card data - add or remove cards/users from the system as required
- Change pricing
- Simple 'Plug and Play' procedures

Features of the USB FMS Report

- Add or remove users via any type USB stick (authorised by you)
- Saves transactions as an CSV file, directly to the USB stick
- Enables data to be easily used for reconciliation reports

Allows You to View

- Vehicle
- User
- Location
- Time and date
- Amount dispensed
- Product used

Operation of the USB FMS is simple

1. Refuelling

- Customer passes their key/card
- Enters pin number (if required)
- Enters ODO / engine hours
- Enters hose or pump number
- Lifts correct nozzle from pump, fills vehicle

2. Collection of Transactions

- User inserts USB stick
- Follow prompts on display
- Transactions exported as CSV file onto USB stick
- Information is displayed on a spreadsheet
