

# Compac OPT

For a world-class  
Outdoor Payment Terminal  
look no further than Compac

The Compac OPT has been designed from the ground up specifically for unmanned, public refuelling in all weather conditions.

Engineered for harsh, dusty environments typical of unattended refuelling locations, yet looks at home on a retail forecourt.

**Compac Industries Ltd.**

52 Walls Road, Penrose, Auckland 1061, New Zealand.

PO Box 12 417, Penrose, Auckland 1642, New Zealand.

 **compac**  
INTEGRATED REFUELLING SOLUTIONS

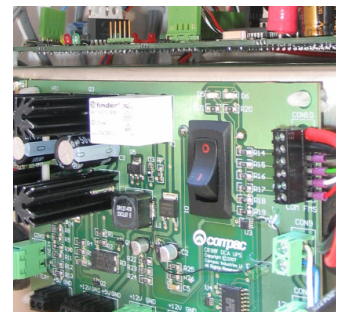

# OPT Applications

The Compac OPT works reliably  
in all installations and under all conditions

Compac has over twenty-five years experience in the refuelling industry, and has manufactured thousands of outdoor payment terminals. Compac specialises in commercial, unmanned refuelling solutions, and their product range is world class.

Compac design and manufacture all critical components of the OPT, allowing them the unique ability to guarantee the quality and performance in all applications.

Their in-house development team comprises of electronic engineers, software developers and mechanical engineering to enable control over all aspects of design, construction and testing.

## → Designed With Your Application in Mind

**Truck Stops** – refuel trucks anytime, from any fleet

**Retail Forecourts** – either for after hours access or for full time unattended sites

**Marina** – made for this harsh environment

**Aviation** – for remote air fields where reliability is crucial

**On-tank Applications** – for transportable solutions

## → Accepts most Cards

**EFTPOS** Customers can use their standard debit card

**Credit card** Takes any local and international credit card

**Account Card** Use store issued 'in-house' white cards

**Fuel/Fuel Cards** Accepts all oil company and fleet cards, in store-and-forward mode

## → Robust Construction

The OPT can cope with extreme weather conditions - heat, rain and humidity.

- full stainless steel construction
- always-on forced ventilation
- internal heater to maintain a stable environment
- reliable printer that works in all installations
- large receipt drop box - eliminating paper jams
- UPS power supply so transactions are always completed

# OPT Features

Fully featured with the latest technology  
and robust for use everywhere

## Simple Connection

The OPT requires only one data connection via either: the 3G mobile network; a LAN connection; or the in-built router. This allows access to

**The Transaction Processing House** – All card transactions are fully encrypted to prevent snooping or tampering

**Helpdesk** – through the OPT's built in VOIP help phone (optional)

**Compac Online** – see box on right for details

## Features

**Proven pump control** which interfaces to all pumps and tank gauging. The OPT can even work with your existing pump controller.

**Extra large paper roll** can print up to 3,500 receipts before the paper needs to be replaced. (That's six months at 20 receipts per day!)

**Low power consumption** and insulated cabinet means the OPT can operate in even the hottest environments

**Extra lighting** Pinpad illuminated for use in any light conditions

**UPS** so transactions don't get lost in a power outage

**Simple to use** with graphical instructions and easy to follow prompts

## Multiple Service and Support options

Service staff can trouble shoot remotely through Compac Online. Spare parts are available ex-stock and from locations throughout Australasia. Because all certified boards are made by Compac you don't have to worry about future spares requirements.

The OPT can easily be connected to a helpdesk via optional inbuilt VOIP phone to ensure your customers are always looked after. Compac also offers various support and service modules to suit your needs and budget, from full 24/7 onsite support using the onsite VOIP phone, through to ad-hoc service as required.

## Compac Online real time monitoring

[www.compaconline.com](http://www.compaconline.com)

Compac Online is the modern way to find out what is happening onsite - without actually being there. From any web browser you have access to full transaction and service information

**Sales** Compac Online automatically downloads sales and tank information to generate custom reports

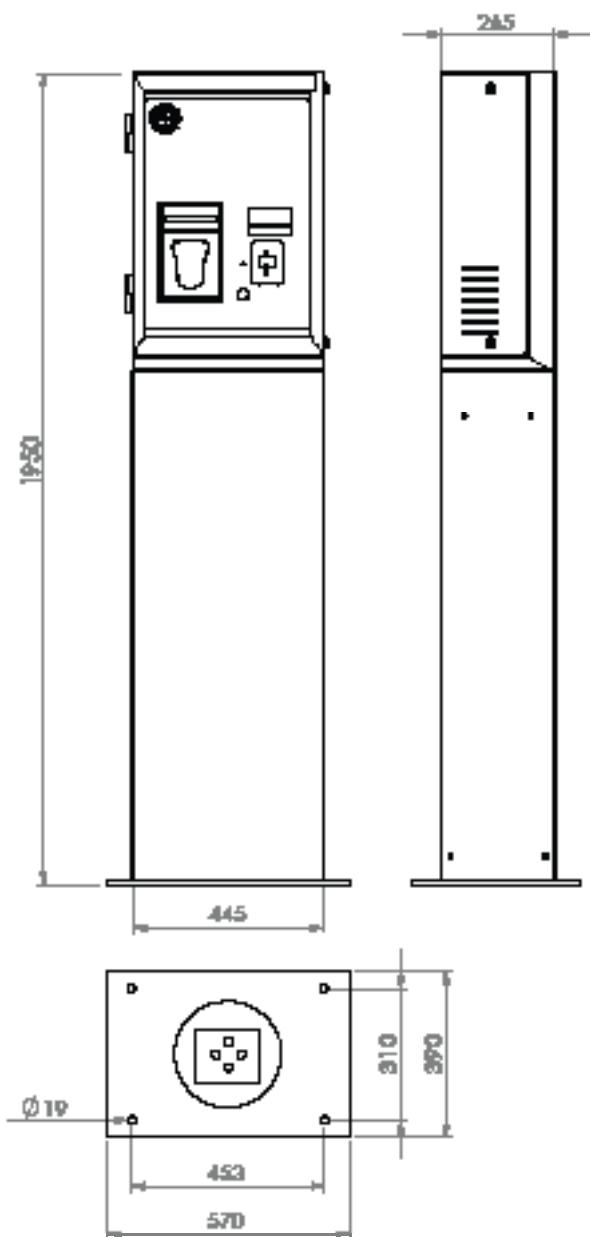

**Service** See receipt printer status and paper levels. Check whether mains power is on and the status of the UPS battery. Get cabinet temperature and status of pumps and tanks. Diagnose errors.

**Security** Set up multiple users with unique security access and log their activity

**Text and Email Alerts** You can determine how and when you are notified of abnormal conditions

**Price Scheduling** Setup price changes in advance, and all your sites update with the new price simultaneously

# Compac Certification

## Approvals

- EMV certified until 2014 (Pending)
- National Measurement Institute of Australia (NMI) approval

## Security

- Transaction Processing House approved to 3-DES, PC PED 2.0 compliant, APCA approved, EMV1 & EMV2
- Unique cabinet locks to prevent unauthorised access
- EMV Cardreader
- Ingenico i9500 Pinpad

## Options

**Voice Over IP Phone** to allow connection to a helpdesk

**Custom branding** decals and powdercoating to suit your individual requirements

**Canopy** for customer shelter, and additional protection against heat, rain and wind. Includes additional lighting.

**Post** 1.2m stand for non wall-mounted applications. Angled or straight post available.
