# Compac is widely recognised as a leading supplier of CNG dispenser technology and integrated refuelling systems

For more than 25 years, Compac's world class CNG dispensers and dispenser technology have set the standard in secure and reliable CNG refuelling. With industry leading technology and products that are designed and manufactured in-house, Compac can guarantee quality and product performance.

Having complete control over the design and manufacturing process, ensures the quality of our products. And with continual investment into product development and internationally achieved approvals, our customers have the confidence to know that Compac products are the perfect choice for safe and secure CNG refuelling.

Compac is a New Zealand owned and operated company established in 1983. We pride ourselves on excellence in customer service, having maintained longstanding and valued customer relations globally over our 25 year history.

## For premium dispenser technology you can rely on, look no further than Compac

The manufacture and design  
of our products, provide Compac  
customers with accurate  
and secure refuelling

The critical components of a CNG dispenser are designed and manufactured in our New Zealand factory: from advanced dispenser control, to highly accurate natural gas metering, to complete CNG dispenser models. Because of this, Compac can confidently guarantee the reliability and performance of our products, providing ongoing technical support and training as required.

Compac is ISO 9001 certified. All our dispensers and components have achieved international approvals and certifications. For copies of these and further information on Compac products visit our website

## For advanced solutions in integrated refuelling systems, Compac has the answer

Designed and developed by our engineers,  
Compac's integrated refuelling systems offer our customers  
the latest technology in site monitoring and control

Compac's range of user friendly products allow our customers to choose the system that best suits their requirements. From dispensers, to forecourt payment systems, to monitoring and reporting - Compac products are designed to make refuelling and site control easy for all. With unattended site monitoring a key feature, the security of our systems is a top priority.

Our on site payment terminals accept a range of cards, from in-house white cards to credit and debit cards. All data and transactions are then accessible via CompacOnline; our secure web based fuel management software. This enables customers to interact with their site from anywhere in the world.
